Source: 2007 Longitudinal Business Database, Economic Censuses, Longitudinal Firm Trade Transactions Database, BEA inward and outward surveys. Table presents share of firm sales and employment in manufacturing versus non-manufacturing establishments. Sample is all US firms with one or more majority-owned manufacturing plants anywhere in the world.

B Factoryless Goods Producer Statistics

This section provides additional facts about factoryless goods producers.

B.1 Definition of wholesale establishments

Wholesale establishments sell goods to other firms (as opposed to consumers) and generally fall under five broad categories: merchant wholesalers, manufacturers' sales branch, agent/broker, electronic market, or other broker/agent. A merchant wholesaler is a 'company or establishment engaged in buying merchandise on its own account produced by other firms and selling them using the wholesale method.' A manufacturers' sale branch is an establishment that sells goods manufactured by other establishments of the firm. An agent/broker is a establishment that buys and sells merchandise on a commission basis, rather than on its own account. An electronic market is an electronic platform that facilitates sales between businesses on a commission or fee basis.

Although wholesale establishments generally operate from a warehouse or office, they are not classified as 'warehouses.' Instead, a warehouse (NAICS 493) is simply a facility for storing goods and keeping them secure. Warehouses do not buy and sell goods, though they may provide logistical support in the distribution of goods, such as labeling, breaking bulk, inventory control and management, light assembly, order entry and fulfillment, packaging, pick and pack, price marking and ticketing, and transportation arrangements.

B.2 EC form question

B.3 2017 Census of Wholesale forms

I use the 2017 Census of Wholesale 'Special Inquiry' questions to identify factoryless goods producers.

2017 Economic Census

B.4 Sample for the Factoryless Goods Producer Analysis

Table B.1 presents statistics on the subset of wholesale firms that do not have manufacturing plants based on whether they are in the factoryless goods producer sample (because they answered the special inquiry questions) or not. The total firms and wholesale employment at the firms in Table B.1 correspond to 89 percent of the total 2017 published number of wholesale firms and 68 percent of their wholesale employment (available here <https://data.census.gov/table?q=EC1742BASIC&tid=ECNBASIC2017.EC1742BASIC&hidePreview=true>).

A factoryless goods producer is defined as a firm with a 'Yes' response to one or more of questions (3), (4), and (5) by at least one establishment. A traditional merchant wholesaler has at least one establishment with a 'No' response to these questions, in addition to zero establishments with 'Yes' responses. We do not use responses to question (2), but note that it strongly correlates with firms having a US manufacturing plant (and these firms are excluded from the sample in the paper by definition).

We define an establishment's design status using question (6). Firm design is 'Yes' for firms with at least one establishment that designs, or 'No' for firms with at least one establishment that does not design and none that do. We leave questions (7) and (8) for future work. Note that the last question is only asked for multi-unit firm establishments.

Table B.1: Sample Statistics for 2017 Factoryless Goods Producers and Merchant Wholesalers

	Firms (000s)	Emp (millions)	Share of Total				
			Firms	Emp	Sales	Imports	Exports
Firms Outside Sample	129	5,012	0.49	0.50	0.39	0.45	0.37
Firms In Sample	137	5,069	0.51	0.50	0.61	0.55	0.63
FGPs	37.3	960	0.14	0.10	0.13	0.32	0.20
Non-FGPs	99.5	4,109	0.37	0.41	0.49	0.24	0.43
Total	266	10,081	1.00	1.00	1.00	1.00	1.00

Source: 2017 LBD, Longitudinal Firm Trade Transactions Database, and Economic Censuses. Firms in table are the universe of firms with one or more wholesale estabs and no manufacturing plants in 2017. ‘Firms in Sample’ are those with at least one establishment in the 2017 Census of Wholesale that respond to questions 3, 4, or 5.

Table B.2: Trade Participation of 2017 Firms Present in 1992 by Factoryless Goods Production Status

	$\frac{Imports}{Sales}$	$\frac{RPIImports}{Imports}$	$\frac{ChinaImports}{Imports}$	Num. country-products

2002	74.93	0.02	0.35	0.36	0.06
2007	88.36	0.01	0.34	0.36	0.06
2012	89.52	0.00	0.33	0.33	0.06
2017	98.71	-	0.34	0.33	0.06

Source: 2017 LBD, Longitudinal Firm Trade Transactions Database, and Economic Censuses. Table presents employment shares across sectors for subset of 2017 firms that are also present in 1992, by year and factoryless goods production status in 2017. Approximately 7,700 FGPs and 27,000 merchant wholesalers are present from 1992-2017.

B.5 Additional statistics on 2017 factoryless goods producers

Figure B.1: Manufacturing Employment Shares for 2017 Firms by Entry Cohort and Factoryless Goods Production Status

Source: 2017 CWH, LFFTD, LBD. Figure plots weighted employment shares by sector for FGPs and non-FGPs. FGPs are firms with one or more wholesale estabs that contract for manufacturing services in 2017. NFGPs are firms with at least one estab that reports not contracting for manufacturing and none that do. Sample is all firms with at least one wholesale estab that responds to the 2017 CMS question and with no manufacturing plants in 2017.

Figure B.2: Shares of 2017 Factoryless Goods Producers' Activities by Contract Manufacturing Location

Source: 2017 LBD, Longitudinal Firm Trade Transactions Database, and Economic Censuses. Figure displays the share of firms, employment, sales, and imports accounted for by factoryless goods producers that contract for manufacturing services from suppliers in the United States (Domestic Only), suppliers in foreign countries (Foreign Only), or both domestic and foreign suppliers (Domestic & Foreign). Figure contains 25,200 factoryless goods producers for which the question about whether they designed their products is not missing. Shares of each activity sum to the total amount of that activity covered by firms without missing data.

Figure B.3: Shares of 2017 Factoryless Goods Producers' Activities by Contract Manufacturing Location and Design Status

Source: 2017 LBD, Longitudinal Firm Trade Transactions Database, and Economic Censuses. Figure displays the share of firms, employment, sales, and imports accounted for by factoryless goods producers (FGPs), based on whether firms purchase contract manufacturing services from suppliers in the United States (Domestic Only), suppliers in foreign countries (Foreign Only), or both domestic and foreign suppliers (Domestic & Foreign). Sample contains all FGPs, including 12,000 firms for which their design status is missing. I impute those firms as purchasing CMS domestically only and performing no design.

Figure B.4: Shares of 2017 Factoryless Goods Producers' Activities by Contract Manufacturing Location and Design Status with Imputed Data

Source: 2017 Economic Censuses, LFFTD, and LBD. Figure displays the share of firms, employment, sales, and imports accounted for by factoryless goods producers (FGPs), based on whether firms purchase contract manufacturing services from suppliers in the United States (Domestic Only), suppliers in foreign countries (Foreign Only), or both domestic and foreign suppliers (Domestic & Foreign). Sample contains all FGPs, including 12,000 firms for which their design status is missing. I impute those firms as purchasing CMS domestically only and performing no design.

C Statistics for 2007 Wholesale and Manufacturing Establishments

This section presents statistics for 2007 manufacturing and wholesale establishments using work from ?, Bernard and Fort (2015), and Bernard and Fort (2017).

C.1 2007 Census of Wholesale Forms

Figure C.1: Questions used to identify wholesale factoryless goods producer establishments

The image shows a screenshot of a form titled "WH-42301 (12/04/2006)" with a header "SPECIAL INQUIRIES - Continued". The section is labeled "C. OTHER ESTABLISHMENT ACTIVITIES".

Question 1: "Did this establishment design, engineer, or formulate the manufactured products that it sold, produced, or shipped?"

- 0318 Yes
- 0319 No

Question 2: "Which of the following best describes this establishment's primary activity? (Mark 'X' only ONE box.)"

- 0362 Providing contract manufacturing services for others
- 0363 Transforming raw materials or components into new products that this establishment owns or controls
- 0364 Reselling goods manufactured by others (with or without minor final assembly)
- 0365 Other - Specify
- 0366

Question 3: "Did this establishment purchase contract manufacturing services from other companies or other establishments of your company to process materials or components that this establishment owns or controls?"

- 0496 Yes, primarily with establishments WITHIN the 50 States and the District of Columbia
- 0497 Yes, primarily with establishments OUTSIDE of the 50 States and the District of Columbia
- 0498 No

Source: 2007 Census of Wholesale form questions.

C.2 factoryless goods producer stats from 2007 data

In Figure C.2, I compare 2007 manufacturing plants that purchase CMS to wholesale establishments that purchase them. Most notably, although a much smaller number (and share) of wholesale plants design products at their establishment (Figure C.2), those that do are considerably more likely to purchase CMS than manufacturing plants. Figure C.3 indicates that just over 30 percent of manufacturing plants that design goods purchase CMS, with less than 5 percent purchasing them offshore. By contrast, approximately 45 percent of wholesale establishments that design their products purchase CMS, with more than 10 percent purchasing them offshore.

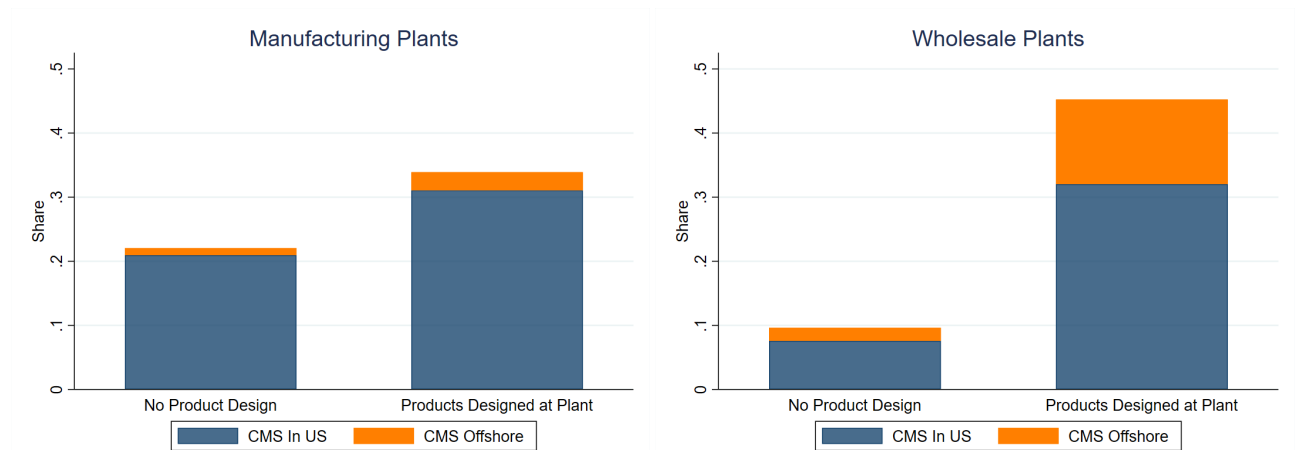

Figure 3 shows that factoryless goods producers have higher shares of Management (NAICS 55) and Professional, Scientific, and Technical Services (NAICS 54) employment relative to non-factoryless goods producers. In 2007, factoryless goods producers had 6.2 percent of their employment in establishments in these sectors, whereas non-factoryless goods producers had only 4.8 percent. Figure 3 also displays these 2007 wholesale firms' past employment shares in these knowledge activities and also in manufacturing.

Figure C.2: Counts of Establishments that purchase CMS and Design Products in 2007, by CMS Purchase Location and Sector

Notes: Figure presents the count of establishments by plant contract manufacturing services (CMS) purchase location and design status. Left panel presents manufacturing plant counts and right panel presents wholesale establishment counts. ‘Products Designed at Plant’ corresponds to an establishment reporting that it did ‘design, engineer, or formulate the manufactured products that it sold, produced, or shipped’. ‘In US’ identifies plants that primarily purchase CMS in the United States, while ‘Offshore’ corresponds to plants that primarily purchase CMS from foreign countries.

Figure C.3: Shares of Establishments that Purchase CMS and Design in 2007, by CMS Purchase Location

Notes: Left panel presents the count of wholesale establishments by plant contract manufacturing services (CMS) CMS purchase location and design status. Right panel presents the share of plants within each product design category that purchase CMS primarily in the US or from foreign countries. ‘Products Designed at Plant’ corresponds to an establishment reporting that it did ‘design, engineer, or formulate the manufactured products that it sold, produced, or shipped’.

Figure C.4: Shares of wholesale plants that purchase contract manufacturing services (CMS) by plant's primary, self-reported activity and design status in 2007

Source: Figure presents share of establishments that purchase CMS within each category of plants' self-reported primary activity and design status. Plants designate their primary activity as: 'CMS' - provide contract manufacturing services to others (3.0% of plants); 'Manuf' - Transforming raw materials or components into new products that this establishment owns or controls (7.2% of plants); 'Other' (14.6% of plants); 'Resales' - Reselling goods manufactured by others (with our without final assembly) (75.3% of plants). 'D' corresponds to an establishment that reports that it did 'design, engineer, or formulate the manufactured products that it sold, produced, or shipped'.

Figure C.5: Average professional and manufacturing employment at wholesale firms in 2007

Source: Figure presents average employment in Manufacturing (NAICS 3), Management (NAICS 55) and Professional, Scientific, and Technical Services (NAICS 54), and Wholesale (NAICS 42) establishments for firms with one or more wholesale establishments but no manufacturing plants in 2007. factoryless goods producer firms in this figure defined as those with wholesale establishments that design goods and are involved in manufacturing, either through purchases of contract manufacturing services or because the establishment itself considers its primary activity to be manufacturing.
